BE CAREFUL WHAT YOU SHARE

Fraudsters use many different sources to collect information, before they try to scam you. Whenever you share online consider what a fraudster could do with it.

PASSWORDS

Passwords are the key to the kingdom, so don't use the same credentials for different online accounts. If one gets hacked, it makes it easy for fraudsters to try other accounts. Make up a unique password by using the three random words technique.

No - you have not won that iPhone, and you were not the 1 millionth visitor. Do not believe the adverts and offers as they are backed by fraudsters after your information, and possibly your identity.

PHISHING WHALING & QUISHING

Look out for red flags: Does the email suggest urgency? Does the sender address look dubious? Is there an attachment you are not expecting? Where does the link go to? How is the spelling and grammar?

https://haveibeenpwned.com/ enter your email, to see which of your online accounts have been compromised. Then go change your password on that account and ask

yourself where else you used that password!

TAKE THE QUIZ

https://quiz.takefive-stopfraud.org.uk A simple check on what you should and should not be responding to online and in text messages. TRY IT & see if you are too smart to be scammed.
